## Recap from Last Lotusphere

### Completely Rebuilt for the Best Spam and Virus Protection for Domino Servers

- Dual Spam Checking Engines
- 3 Anti-Virus checks
- Higher Performance
- Fault Tolerant
- Discrete Component Architecture (DCA)
- Checking in to maysoft.com
- Auto-update fully implemented

## 2008 Accomplishments

- User Controlled Auto-Update
- Blocking at SMTP session level (Spam-D = 80% of spam)
- Judicious use of RBL (as a tie-breaker)
- Fully implemented Spam-B
- Lotus Notes Spam Blog

## SpamSentinel Today

Hosted	Gateway	Desktop
<b>MX record redirect</b>	<b>Domino Server</b>	<b>Lotus Notes Client</b>
		

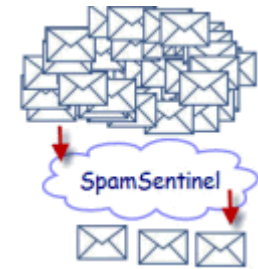

### A Complete Offering

SpamSentinel can be delivered three different ways maintaining 99.44% block rate

- Mix and match products
- Switch between them at any time
- No extra fees \*

## Hosted SpamSentinel

- ❑ No installation, just an MX record redirect
- ❑ Stops spam at our hosted servers
  - Dedicated redundant & locked down infrastructure
- ❑ Only sends the good mail
- ❑ Store and forward if your Lotus Domino server is down
- ❑ Spam-B sent to user's JunkMail folder
  - No Quarantine
  - No Daily Report
  - No Administration

## Planned for 2009

- ❑ Support of 64 bit Domino (beta)
- ❑ Reworked Client (Easier to use and control)
  - Self-updating
  - Latest anti-spam scanning updates for Commtouch and Cloudmark
  - Latest anti-virus scanning updates for Norman
  - Communication with Maysoft for problem monitoring
  - Multi-threaded (for fast re-scanning)
  - Easy distribution and mail box discovery setup program
  - Reworked graphical interface
  - Multi-mailbox support
  - Enhancements to make client work closely with server version
  - Mail alerts when waiting for important emails
  - Non-Notes mail system support
